

SYNOVA SA Innovative Laser Systems

**“Where others see impossibilities,
we see solutions”**

Headquartered in Ecublens near Lausanne, Synova is the pioneer of a revolutionary hybrid laser processing technology – Laser MicroJet®. Synova provides state-of-the-art high precision material processing in the semiconductor industry as well as for emerging applications in the electronics, MEMS, solar cell, flat panel display and medical industries.

To support Synova’s exciting growth, we are looking for a

R&D Manager

based in Ecublens

In this position you will:

- Lead the technical development of key components and processes to continuously enhance the Laser MicroJet technology
- Represent the company as a technology leader at external conferences and seminars
- Manage a highly skilled R &D Engineers team to deliver projects according to schedule
- Source and qualify external partners to expand availability of resources
- Conduct research projects to develop the Laser MicroJet technology into new applications fields

For this position, we are looking for candidates with the following profile:

- At least 5 years management experience of an R&D team covering laser, fluid or materials sciences.
- Proven project management expertise
- Outstanding analytical ability and technical judgment
- Advanced university degree (PhD preferred) in a relevant scientific field
- Excellent verbal and written communication skills in English

Do you want to join our fast-growing, innovative and progressive company? If you feel that you have the qualities to make an effective contribution, please apply now:
