

Headquartered in Ecublens near Lausanne, Synova is the pioneer of a revolutionary hybrid laser processing technology – Laser MicroJet®. Synova provides state-of-the-art high precision material processing in the semiconductor industry as well as for emerging applications in the electronics, MEMS, solar cell, flat panel display and medical industries.

We are looking for a

R & D Engineer

In this position in Ecublens you will:

- Provide technical leadership for our Laser MicroJet laser cutting technology
- Participate in multidisciplinary R&D projects in collaboration with other departments
- Develop and improve process performance
- Set up, conduct and document experiments
- Support the deployment of new techniques / practices in other departments
- Enable and support the roll out of solutions for industrialization
- Assist in selecting and evaluating new components

For this position, we are looking for solution-oriented candidates with the following profile:

- Material Science, Microengineering or Physics background with several years of R&D experience in a field relevant to the company's activities
- Background in optics and solid-state lasers of advantage
- Good exposure to quality practices
- Track record of development and improvement of industrial products / technologies
- Experience in managing projects from concept to industrialization
- Open minded and innovative with excellent technical problem solving skills
- Good oral and written communication abilities
- Fluent in English; good knowledge of German is a plus

If you feel that you have the qualities to make an effective contribution, please apply now:
