

Headquartered in Ecublens near Lausanne, Synova is the pioneer of a revolutionary hybrid laser processing technology – Laser MicroJet®. Synova provides state-of-the-art high precision material processing in the semiconductor industry as well as for emerging applications in the electronics, MEMS, solar cell, flat panel display and medical industries.

To support Synova's exciting growth, we are looking for an

## Project Leader – Machine Development

In this position based in Ecublens you will:

- Lead for the assigned projects the development and engineering of automated high precision laser cutting machines and its sub-components
- Ensure with his team that needs are analyzed and establish accordingly the machine specifications
- Look for optimized technical solutions, mechanical, pneumatic, electrical elements and robots, and to dimension critical components
- Drive the project team to excellence and to deliver commitments on-time
- Manage the testing of the prototypes
- Prepare the technical and industrialization documentation

For this position, we are looking for candidates with the following profile:

- Mechanical / Microtechnic Engineering background with several years of experience in automated machine tool development
- Strong technical project management expertise
- Experience in self managing projects from concept to industrialization within the machine tool industry
- Good knowledge CAD tool (SolidWorks)
- Excellent technical problem solving skills
- Fluent in English and French or German

Do you want to join our fast-growing, innovative and progressive company? If you feel that you have the qualities to make an effective contribution, please apply now.
