

Headquartered in Ecublens near Lausanne, Synova is the pioneer of a revolutionary hybrid laser processing technology – Laser MicroJet®. Synova provides state-of-the-art high precision material processing in the semiconductor industry as well as for emerging applications in the electronics, MEMS, solar cell, flat panel display and medical industries.

To support Synova's exciting growth, we are looking for a

## Software Development Manager

In this position based in Ecublens you will:

- Manage the development and deployment of our embedded machine tool software
- Lead our team of highly skilled software engineers and external resources
- Ensure that the software required for the customized machines is developed on-time and defect free
- Develop strategies and lead implementation to improve the efficiency, stability and scalability of our current software solutions
- Organize and support software troubleshooting at our customer sites

For this position, we are looking for candidates with the following profile:

- Software engineering background including at least 5 years of embedded software development for industrial equipment
- At least three years previous experience in managing software development teams
- Practical knowledge of embedded software architecture, development and testing methodologies
- Project management expertise, including scheduling and tracking
- Ability to manage conflicting priorities and willingness to work effectively in a business-critical production environment
- Excellent communications skills in English with good command of French

Do you want to join our fast-growing, innovative and progressive company? If you feel that you have the qualities to make an effective contribution, please apply now.
