

SYNOVA SA Innovative Laser Systems

“Where others see impossibilities,
we see solutions”

Headquartered in Duillier near Nyon, Synova is the pioneer of a revolutionary hybrid laser processing technology — Laser MicroJet®. Synova provides state-of-the-art high precision material processing in the semiconductor industry as well as for emerging applications in the semiconductor, diamond, watch industry and currently also in the energy industry.

To support Synova’s activities, we are looking for an

After Sales Service Engineer

In this position you will:

- Repair breakdowns and perform preventive maintenance at our customers’ sites
- Ensure telephone assistance to enable problem solving for our customers
- Handle installation and start up of our equipment
- Act as technical advisor to our machine development group
- Provide customer training within and outside the company

For this position, we are looking for candidates with the following profile:

- Technician or engineering background with an excellent knowledge of automated machine tool
- Several years hands on experience in the machine tool industry
- Knowledge of Programmable Multi-Axis Controller and laser technology
- Excellent problem solving skills
- Ability to work under pressure
- Good command of German and English, French an asset
- Ready to travel up to 50%

Do you want to join our innovative and progressive company? If you feel that you have the qualities to make an effective contribution, please send your application (resume, certificates and cover letter) directly to the After Sales Manager: daniel.buemi@synova.ch

Please, note that we will contact only the selected candidates. Many thanks for your understanding.
