

Synova / Newsletter / December 2022

During the Season we take time to reflect upon the good things we have... like our partnership with you!

A lot has happened at Synova in the past year and especially in the last few months. Not only did we open a new DaVinci Lab in Dubai, but we also inaugurated our new production hall, celebrated our 25th company anniversary and won the William M. Steen Award.

For many of us, something like normality has returned after two years of pandemic. We can look back with pride on an eventful and successful year.

The end of the year gives us the opportunity to thank you for your continued loyalty and business cooperation during this year. We sincerely wish you, your families and friends a joyful festive season and a happy New Year!

Your Synova Team

Time to give

Synova Donates for Cancer Research and Sick Children

This year we support different organizations with donations. One is the Swiss cancer foundation "Fond'Action", which supports promising new research projects in oncology and the financing of novel treatment methods. Another one is the foundation "Le Petit Cœur", whose medical team operates free of charge on children with heart disease in Mozambique and Cambodia, financing the necessary drugs and equipment and training local medical staff.

25 years Synova

Big Celebration of Synova's Silver Company Anniversary

Synova looks back on 25 years of company history and says THANK YOU! Some of you have been with Synova through ups and downs in the past 25 years. In early November, Synova celebrated its anniversary with employees, customers, partners, suppliers and friends. Besides inspiring speeches, company tours and lots of music and dancing, a nocturnal laser show was one of the highlights of the festivities.

Application Video

Cutting Seal Stamp for the 25th Anniversary of Synova

In the course of celebrating the 25th anniversary of the company, we produced a wax seal stamp with our anniversary logo. In this video you can see how the 25th anniversary logo is cut out of a 6 mm thick brass block.

Award ceremony

William M. Steen Award for Synova's LMJ Technology

The Laser Institute of America (LIA) awarded Synova with the prestigious William M. Steen Award for significant developments in laser material processing. Synova was nominated by a recognized aerospace manufacturer for the development of the Laser MicroJet® technology and its innovative use out of almost 50 applications. John Ross, Synova USA's Director of Operations, received the award for Synova in Florida.

Shop Floor Lasers / MSM

Press Review: Read About Synova in the News

The US magazine **Shop Floor Lasers**, which is dedicated to laser technology in manufacturing, writes in its article "Thin as film" about the possibilities and advantages of the LMJ technology in thin-film markets and reports on customer applications and experiences. In October, the Swiss industry journal **MSM** published an exciting retrospective on 25 years of Synova, which is also available in English on our website.
